

# SLIPSTOP

## SEALERS AND IMPREGNATORS

PRODUCTS: S I55, S I55C

SLIPSTOP IMPREGNATORS are unique polymerised silicone formulations designed for protection of all porous tiles and stone surfaces

SLIPSTOP IMPREGNATORS seal the pores, yet allow the surface to breathe. The low viscosity allows maximum penetration and superior coverage. It is U.V. transparent, resists acid rain and not yellow under any circumstances. It is equally effective for interior as well as exterior applications.

All surfaces treated are harder and less slippery, as well as being stain resistant. Because SLIPSTOP IMPREGNATORS are penetrators and not surface coatings the treated material retains its natural look. Dirt, water and oils are prevented from penetrating. Surface dirt is easily removed through regular maintenance methods.

SLIPSTOP IMPREGNATORS inhibit the growth of mould, mildew and fungus in humid and damp areas.

### Performance

Independent laboratory tests show SLIPSTOP IMPREGNATORS outperform competitive products.

### BENEFITS

- Seals and protects against dirt, water, grease and oil.
- Can be used indoors and outdoors
- Invisible, does not alter the appearance
- Inhibits growth of mould, mildew and fungus in humid and damp areas
- Surface dirt is easily removed from treated areas
- USDA approved for incidental food contact
- Also works as a graffiti repellent

### AUSTRALIAN STANDARDS COMPLIANCE

Our products are compliant with AUST Standards:

- AS 4586:2013 (For new pedestrian ways)
- AS 4663:2013 (For existing pedestrian ways)
